

# DIAGRAM SIXFOLDCARD

The card is simply to make once you get the folding and cutting down. The main body of the card is an 8"x12" piece of card stock. The piece of cardstock is scored at 4" and 8" along the 12" side.

Then score the 6" side at 2" and 6". The remaining step is to cut the card out using the score lines. I have inserted a diagram of the cutting sequence below.
